

■ Snapshots of the Pages and their explanations:

→ Below is the snapshot of the eclipse ide files which are created in order to make this Airline Booking Portal.

→The next is the Homepage FlyAway Portal.

-> Now here even if the user is New User or the admin, In this page the user can search for a flight and he will also get the result. But to book the flight the user must be a Registered User . Options here are:

- 1: User Login
- 2: Admin Login
- 3: Just search For Flight

FlyAway

[User Login](#)

[Admin Login](#)

From :-	<input type="text"/>
To :-	<input type="text"/>
Departure :-	<input type="text"/>
Travellers :-	<input type="text"/>
<input type="button" value="Search"/> <input type="button" value="Reset"/>	

-> Now if the user wants to book a flight then he has to *Login*.

-> Here the user has a option to get registered if he is a new user.

-> If he is an existing user then he can simply login by providing the ID and Password

-> If the user credentials are authentic then login will be successful

[Admin Login](#)

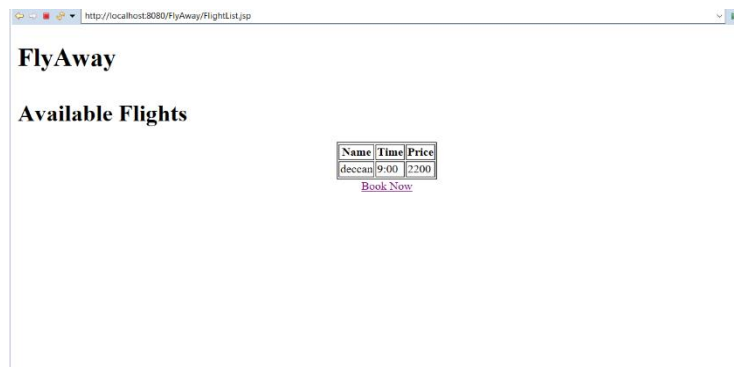

Welcome null

[Logout](#)

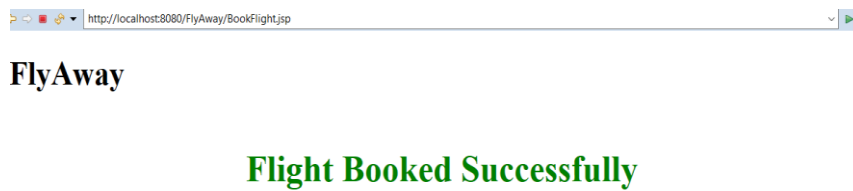

From :-	<input type="text" value="hyd"/>
To :-	<input type="text" value="gnt"/>
Departure :-	<input type="text" value="21-04-2021"/> ×
Travellers :-	<input type="text" value="1"/>
<input type="button" value="Search"/> <input type="button" value="Reset"/>	

FlyAway
By: Saurav Kumar

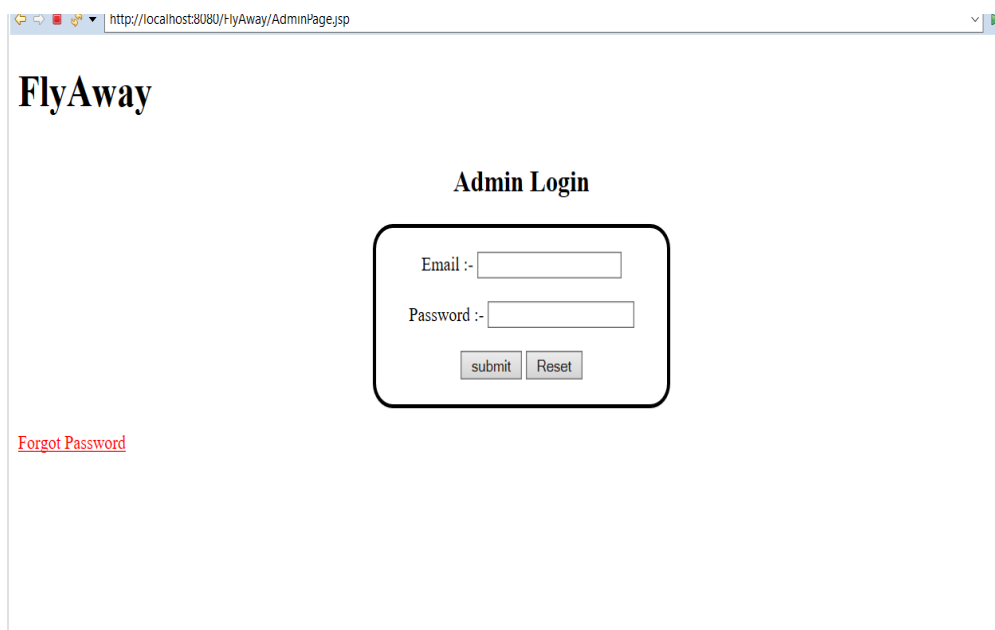

->The list of available flights will be displayed

->If user wants to book the available flight he just needs to press *BookNow* . The flight will be booked with booking confirmation in the next screen

->The portal also has a dedicated Admin Login where admin can *Add flight* .

FlyAway
By: Saurav Kumar

-> After the admin logs in with his credentials he has an option to add flight

FlyAway

Insert New Flight Details

Name :-

From :-

To :-

Departure :-

Time :-

Price :-

->Admin fills the details of the new flight and submits. Then the new flight will be available for the user to book.
